## A. Game Inspection

Fig. 1 Game Overview

## WARNING

Check before plugging the game in !

The game "Arm Wrestling" is shipped ready for operation, but a last visual check should be made to insure the final touch of quality control. Please check the following to help us insure that your new game was delivered to you in good condition.

- (1) Check the exterior of the game for shipping damage, dents, chips, or broken parts.
- (2) Remove the screws on the Rear Door Panel.
- (3) Unlock and open the Rear Door Panel, as well as the Service Door. Inspect the interior of the game as follows:
  - (a) Check that Plug-in connectors are firmly connected.
  - (b) Check that Plug-in integrated circuits on the Game PCB are firmly connected in their sockets.
  - (c) Check that all major subassemblies such as the Power Supply, Operation Panel, and Video Monitor are properly mounted.
  - (d) Remove the tie-wrap that holds the coiled Power Cord on the inside cabinet wall. Check the cord for any cuts or dents in the insulation.

## B. Game Installation

Fig. 2 Installation Requirements

Power	:	170 watts
Temperature	:	0 to 38 deg.C (32 to 100 deg.F)
Humidity	:	Not over 95% relative
Space required	:	63 (W) × 90 (D) cm (24 3/4 × 35 1/2 in.)
Height	:	189 cm (74 1/2 in.)

### (1) Voltage Selection

Before plugging in your game, make sure the Terminal Block of the Power Transformer is correct for your location's line voltage.

This game uses one of two types of transformers which are different in appearance but identical in function. The two types can be interchanged.

Fig. 3 Power Supply Assembly, Power Transformer and Voltage Selection

**(2) Power On/Off Switch**

A Power On/Off Switch is located in the rear of the game at the bottom center of the cabinet. See Fig. 1.

If the results of the preceding steps are satisfactory, you are ready to plug the game in, and set the Power On/Off Switch to the "On" position.

**WARNING**

This game **MUST** be grounded. Failure to do so may result in destruction of electronic components.

**(3) Grounding of Game (Use only if 3 wire outlet is unavailable.)  
See Fig. 4**

- (a) A grounding wire should be connected to a grounding bar or a metal pipe which is firmly inserted into the ground.
- (b) Do not connect the grounding to a water pipe, because polyvinyl-chloride pipes are sometimes used in water lines, and the electronic continuity to the ground may be interrupted.
- (c) Absolutely do not connect the grounding wire to a gas pipe, as this can be extremely dangerous.

**Fig. 4      Grounding of Game**

#### (4) Adjustment of Video Monitor

This game uses one of four types of Video Monitors which are different in appearance but identical in function. The four types can be interchanged.

- (a) Video Monitor : [32 Type] 20-EZV(R-C)
- (b) Video Monitor : [33 Type] 20-EZV(R-C)
- (c) Video Monitor : [35 Type] 20-Z2AW

- (b) Set for Self-Test Mode with Toggle P (SW2) on the Game PCB. And set the Power On/Off Switch to the "On" position.

- (2) Self-Test and Bookkeeping are self-explanatory on the Video Monitor as follows.

## 4. Maintenance and Repair

### A. Fuse Replacement

This game contains 4 fuses. Replace fuses only with the same type as listed below.

Fig 10 Specification of Fuses

(1) Main Fuse	U.S. : 5A 125V ( 90~120V) Europe : 3A 250V (200~240V) See Fig. 1 and 3
(2) Power Supply Fuse	3A 125V(Midget) See Fig. 3
(3) Video Monitor Fuses	
(a) [32 Type] 20-EZV(R-C)	4A 125V(Slow Blow) 0.3A 125V(Midget) See Fig. 5
(b) [33 Type] 20-EZV(R-C)

(d) [Y51 Type] XM-2001N	2.5A 125V(Slow Blow) 3A 125V(Slow Blow) See Fig. 6

### B. Cleaning

The exterior of the game, all metal parts and all plastic parts can be cleaned with a nonabrasive cleanser. You should be careful when cleaning the glass or plastic parts. A dry cloth may cause scratches which will result in a foggy appearance.

### C. Operation Panel

#### (1) Operation Panel Removal

Before repairing or replacing any switches or Complete A2PL Controller Ass'y. on the Operation Panel, unplug the game. Open the Service Door, which are reach through the opening, and unlock the Clamps, located at each end on the underside of the Operation Panel. See Fig. 13.

#### (2) Micro-switch Replacement

Whenever you replace any micro-switch on the Operation Panel, a switch gap adjustment is needed as shown in Fig. 11. Also, see Fig. 19. for layout of Control Panel Switches.

Fig. 11 Switch gap adjustment

(3) Lubrication for Complete A2PL Controller Ass'y.

To maintain the Complete A2PL Controller Ass'y. in good condition, lubricate the pillow balls and 2 way Guide Plate approx. every 3 months. See Fig. 12.

Fig. 12 Lubrication points

## D. Video Monitor Removal

### (1) Front Screen Removal

First remove the Operation Panel and then pull the Front Screen toward you.

Fig. 13 Front Screen and  
Operation Panel Ass'y. Removal

## (2) Video Monitor Removal

If you need to remove the Video Monitor, follow the instructions listed below. But the following procedure should only be performed by an experienced service technician.

### WARNING

It is recommended the game be left unplugged for at least one hour before removing the Video Monitor. This will probably discharge the CRT, but extreme caution is still necessary.

- (a) Make sure game is unplugged !!
- (b) Open the Rear Door Panel and remove the Front Screen.
- (c) Unplug all the harnesses and cables from the Video Monitor.
- (d) Standing at the front opening of the game, remove the four mounting bolts and flat washers. See Fig. 14.
- (e) Carefully lift the Video Monitor and pull toward you.

### WARNING

Use extreme caution and do not touch electrical parts of the yoke area with your hands or with any metal object in your hands.

Fig. 14 Video Monitor Removal

## E. Game PCB Removal

- (a) Make sure the game is unplugged!!
- (b) Open the Rear Door Panel.
- (c) Remove the 56-pin edge connector from the right side of the 054-FCC PCB on the 054 Shield Cover.
- (d) Pull out 6 Fasteners located on perimeter of the 054 Shield Cover. See Fig. 15.
- (e) Remove the Game PCB from the 054 Shield Cage by carefully sliding it straight out of the wooden PCB retainers.
- (f) Pull out 2 Fasteners in the middle of the 054 Shield Cover. The Game PCB can now be removed. See Fig. 15.

Fig. 15 Game PCB Removal

### WARNING

A reversed connector will damage your PCB!  
If the connectors don't slip on easily, don't force them!

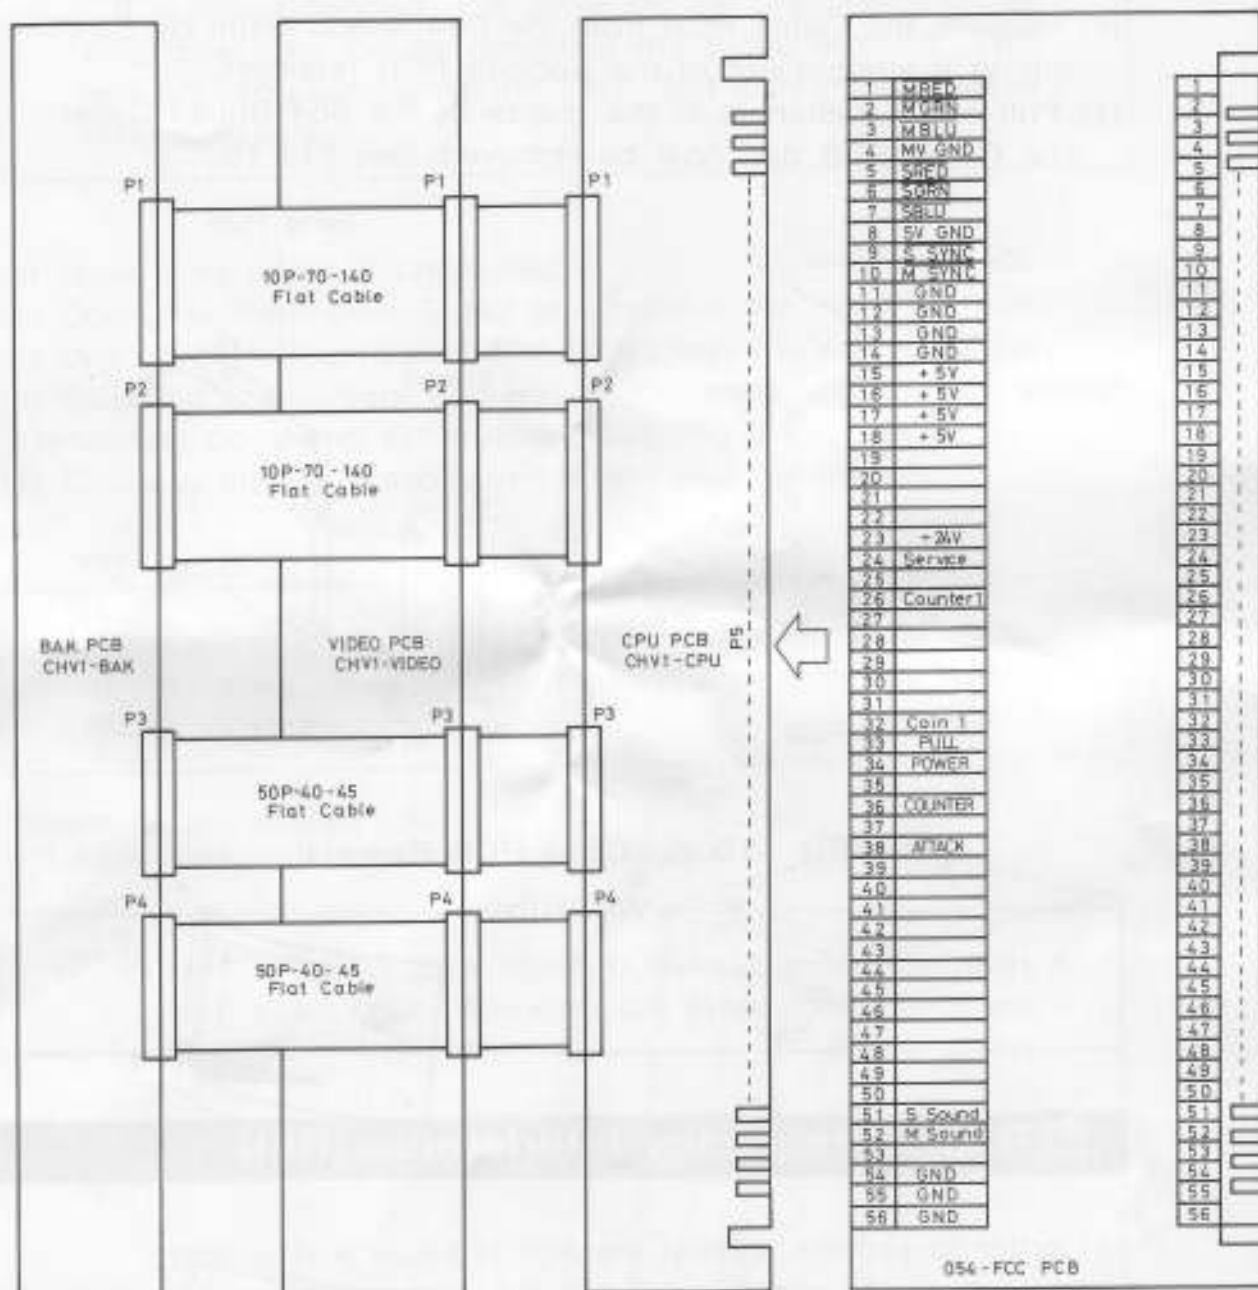

## 5. Radio Frequency Interference (RFI)

In order to protect against the RFI radiated from this equipment, please comply with the following.

- (a) Do not use non-Nintendo parts!
- (b) Do not modify your game circuitry!
- (c) Do not modify the wiring harness and connections!
- (d) Connect this game only to a grounded 3-wire outlet.
- (e) After servicing the Game PCB, shut the 054 Shield Cover completely with the Fasteners. See Fig.15.
